● ABOUT ME

Muhammad Usman — a Goal-focused Full Stack JavaScript (React &Strapi) Developer with 1 year of experience in React.js, TypeScript, and Strapi CMS. Skilled in developing modern, responsive user interfaces and integrating RESTful APIs for dynamic content management. Adept at collaborating with teams to deliver high-quality web solutions and eager to explore backend technologies such as Node.js and Express.js to move toward full-stack development.

● SKILLS

Languages

JavaScript (ES6+), TypeScript, ECMAScript, OOP, Java

Libraries & Frameworks

React.js, React Router DOM, React Hook Form, Redux Toolkit, Material UI, Tailwind CSS, React-Bootstrap, Styled Components, Yup, Formik

Core Frontend Skills

HTML, CSS, ReactJS, JavaScript, TypeScript, Redux, Fetch API, Axios, Responsive Design, Debugging, Cross-Browser Compatibility, Authentication, Analytics

Core Backend Skills

Strapi CMS, GraphQL, Apollo Server / Apollo Client

Soft Skills

Effective Communication, Problem Solving, Time Management, Attention to Detail, Team Collaboration Adaptability, Continuous Learning

Developer Tools

VS Code, Visual Studio Code, Postman, npm, Vite Git & GitHub, Vercel, Figma

WORK EXPERIENCE

⊞ MUHAMMAD USMAN – REMOTE, PAKISTAN

FULLSTACK JAVASCRIPT DEVELOPER (React &Strapi) – BLOOMRIX

Worked on several full-stack projects using React.js, TypeScript, GraphQL, and RESTful APIs, focusing on building scalable front-end architectures and integrating backend services. Gained experience in handling API CRUD operations, CMS integrations, and authentication systems, ensuring smooth data flow and secure user interactions.

Key Responsibilities & Achievements:

- Developed and maintained dynamic, responsive web applications using React.js and TypeScript.
- Integrated GraphQL and RESTful APIs for seamless backend communication and CRUD operations.
- Implemented authentication and authorization features to enhance application security.
- Connected and customized CMS platforms (Strapi) for content management and API structuring.
- Utilized tools like Postman for API testing and Chrome DevTools for debugging and performance optimization.
- Collaborated with cross-functional teams to deliver high-quality, production-ready components.

Key Learnings:

- Improved understanding of frontend-backend integration and data handling with APIs.
- Enhanced skills in building modular, reusable, and maintainable React components.
- Strengthened practical knowledge of authentication workflows, CMS usage, and error handling.
- Developed confidence in managing end-to-end feature implementation and client-driven project requirements.

FRONTEND DEVELOPER – CLIENT PROJECT (INDIA)

I independently handled a client project for an Indian cousin-based platform, where I was responsible for building and managing the frontend from the ground up. This project was a major milestone in my journey, giving me real-world experience in team collaboration and full-cycle component development.

Key Responsibilities & Achievements:

- Developed reusable React.js + TypeScript components using ShadCN UI, Redix UI, and other modern component libraries.
- Built interactive modals, forms, and fully functional UI sections with strong attention to user experience.
- Integrated GET and POST APIs using Postman for testing and debugging backend interactions.
- Ensured a responsive and accessible design across multiple devices and screen sizes.
- Collaborated with the team in a professional development environment, participating in

discussions, giving/receiving feedback, and working within Agile workflows.

Key Learnings:

- Gained in-depth knowledge of building scalable UIs in a production-ready React ecosystem.
- Strengthened understanding of API consumption, component reusability, and code modularity.
- Improved team communication and collaboration through regular stand-ups and peer discussions. This project gave me a real-world, production-level experience and boosted my confidence in handling complete frontend modules independently.

🏢 MUHAMMAD USMAN – REMOTE, PAKISTAN

FRONT-END REACT JS INTERN (DEVELOPERHUB)

During my internship at DeveloperHub, I was given daily tasks focused on building beginner to intermediate-level frontend projects. This hands-on experience allowed me to improve my practical understanding of React and modern frontend development.

Key Responsibilities:

- Developed various small to mid-scale projects using React.js, improving my skills in component-based architecture.
- Implemented API handling using tools like Axios and Fetch, ensuring efficient data fetching and error management.
- Worked with Redux Toolkit and Context API for state management in different project scenarios.
- Practiced responsive design techniques using CSS, Flex, and Material UI to ensure mobile- friendly interfaces.
- Gained experience in component reusability, routing, and basic authentication flows.

EDUCATION AND TRAINING

BACHELORS IN COMPUTER SCIENCE – University of Wah   18/10/2020 – 10/10/2024

PROJECTS

Car Dealership Web Application

Tech Stack: React.js, TypeScript, Strapi 5, GraphQL, Material UI, LottieFiles

Developed a fully responsive car dealership web application that serves as a 24/7 virtual showroom. The platform allows users to explore cars by categories (New, Used, Sold) as well as by brand, color, price, and model year, with content dynamically managed through Strapi CMS. The frontend was built using React.js and TypeScript with a clean, modern UI powered by Material UI components.

Restaurant Meal Solutions Web Application

Tech Stack: React.js, TypeScript, Strapi 5, GraphQL, React Bootstrap, LottieFiles

Developed a modern and fully responsive restaurant web application that showcases various food services such as Ready Meals, Outdoor Catering, In-House Menus, Frozen Foods, and Mobile Kitchen Ideas. The application is powered by Strapi 5 CMS for dynamic content management and leverages React.js with TypeScript for building an interactive, user-friendly interface.

Quick Delivery Website

Tech Stack: React, TypeScript, Redux Toolkit, RTK Query, React Router, JWT
Developed a secure eCommerce platform with JWT authentication & private routing for access control. Implemented add to Cart search & price filtering, optimized API interactions using RTK Query, and ensured efficient state management with Redux Toolkit.

Organic Agriculture Website

A responsive React.js web app dedicated to organic agriculture, featuring 4-6 pages showcasing healthy food options with card layouts. The site includes intuitive item purchasing functionality, reusable components, and smooth navigation using React Router. It optimizes performance with Lazy Components and Structure Loaders, ensuring a seamless shopping experience for users seeking organic products.
